Technical Skills

Languages and DataBases: C, Python, HTML, CSS, JavaScript, TypeScript, SQL, MongoDB
Development Framework & Stacks: Next.js, MERN Stack, ASP.NET
Other Skills: Version Control, Containerization, WebSockets, Redux

Experience

Summer Training | Digicoders **July 2024 – Aug 2024**
Lucknow, India

- Gained hands-on experience in **HTML, CSS, JavaScript, C, Bootstrap**, and **ASP.NET**.
- Developed a project called **"Online City Representation for Tourism"** using **ASP.NET MVC**, focusing on designing an interactive and informative platform for tourists.
- Received the **Best Performer** award for exceptional performance throughout the training.
- Secured **first rank** in each quiz on **CSS, C, and JavaScript** in the batch, demonstrating strong technical proficiency.
- Collaborated in a team environment, improving problem-solving and coding skills while developing a real-world application.

Personal Projects

1. **ChessWar: Real-Time Multiplayer Chess Game | React Js, WebSockets, TypeScript** **Aug 2024 - Sep 2024**
   - Developed and deployed a real-time multiplayer chess game, **ChessWar**, enabling interactive gameplay through WebSockets.
   - Built the backend with Express.js and WebSockets, ensuring smooth real-time player interactions and efficient game state synchronization.
2. **CodeLabs | Platform for Coders and Programmers** **Sep 2024 - Present**
   - Developing **CodeLabs**, a platform aimed at making programmers proficient through features like **community support**, **AI chat bot for learning assistance**, **coding quizzes**, **course management system (CMS)** for both **free and premium courses**, and an **explore section** for discovering coding opportunities similar to LinkedIn.
   - **Built using the MERN stack to provide seamless user experience and robust backend services.**
3. **Vedika Restaurant | Restaurant Management Platform** **Nov 2025 - Jan 2025**
   - Developed a **restaurant management system** for **Vedika Restaurant** featuring **online ordering**, and **inventory management**.
   - **Integrated a secure payment gateway for seamless transactions and designed an intuitive interface for staff to view previous orders.**

Minor Projects

1. **Basic Blog Web App**
   - **A simple blog web app with JWT authentication to view and create blogs, built using the MERN stack.**
2. **Basic E-commerce Platform**
   - **A basic e-commerce site with product fetching via API, add to cart functionality, and login/signup authentication, built with MERN stack.**
3. **Basic Chat Web App**
   - **A simple chat web app for real-time communication, built using WebSockets for messaging.**

Education

Government Polytechnic **Aug 2022 – June 2025**
Diploma in Computer Science And Engineering *Aadampur, Gonda*
